

**JACK  
RABBIT**

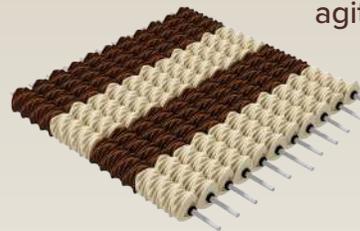

**“Built for Speed...  
Born to Run”**

# HARVESTER

**Lower Dust – Cleaner Product – Faster Speed**

- Constant Race Technology for agitated conveyance and maximum dirt removal before reaching the fan

Jackrabbit's new harvester is specially designed to impact dust generated during harvest. A radically new, disk based cleaning section provides agitated conveyance of the product before reaching the twin-rod outload chain and cleaning fan. The hydrostatically controlled fan permits the grower to adjust fan speed for optimal airflow required to clean the product.

# HARVESTER

Lower Dust – Cleaner Product – Faster Speed

Hydrostatic pump for variable fan speed

Pickup head and cleaning cartridges for rapid repair

Adjustable damper to fine tune airflow

## SPECIFICATIONS

Height .....86.5"  
 Weight..... 4,912 Lbs.  
 Length.....210"  
 Axle to Axle Length ..... 96"  
 Width..... 99.89"  
 Pick-up Belt Type .....Twin-Rod  
 Pick-up Width..... 48.75"  
 Cleaning Width .....48.14"  
 Number of Cleaning Shafts..... 11  
 Number of Disks per Shaft..... 64  
 Total Number of Disks.....704

Disk Material ..... Acetal  
 Disk Cleaning Gap (Constant).....3/16"  
 Incline Chain Type .....Twin-Rod  
 Fan Type..... Centrifugal  
 Flow Controls .....Pick-up Belt  
 Hydraulic Coupler Type ..... Parker 6601-6602  
 Hydraulic Fluid Type..... ISO 68  
 Hydraulic Tank Size ..... 41 Gallons  
 PTO RPM..... 540  
 Minimum HP Requirement.....85
